Ladies and Gentlemen,

Today the Central Intelligence Agency is fortunate to have with it Mr. James Martin. Mr. Martin is generally acknowledged as the computer industry's most widely read author and foremost authority on the social and commercial impact of computers.

James Martin was born and educated in England where he received his degree in physics from Oxford University.

He was with IBM for 19 years, both in the field and in the development laboratories. He spent 10 years at the IBM Systems Research Institute in New York. At present, he is an independent consultant.

James Martin has been an advisor to several governments. He advised the U.K. government about restructuring telecommunications in Britain and changing the role of the Post Office. He was also a member of the first joint Russian-American committee to study possible changes in computer skills.

Mr. Martin is the Chairman of the Board of DMW Group and founder and Chairman of Database Design Inc., both of Ann Arbor, Michigan. He is also on the board of several companies.

Mr. Martin has written ³³~~31~~ major books on computers and telecommunications. Among them is The Wired Society, published in 1978, and nominated for a Pulitzer Prize.

As the creator of Deltak's Advanced Technology Library, he is currently making 280 training modules related to the subjects of his books. Recently he was made a lifetime fellow of the

Association of Computer Programmers and Analysts for his contributions to data processing education. He made the world's first educational course on Videodisk.

Today, James Martin is scheduled to present four unclassified seminars, the first of which is on Computer Security. So without further delay, please let me present Mr. James Martin.

Permit Mr. Martin to clear.
